

# **Ba-PRO Right Response**

One day you know

- Reduce direct and consequential material damage
- Avoid reputational damage
- Increase Business Continuity
- Offer a safe environment for employees and customers

When incidents happen Ba-PRO Right Response supports. Employees receive an alert in which they find the information to act immediate and correct to reduce damage.

# How?

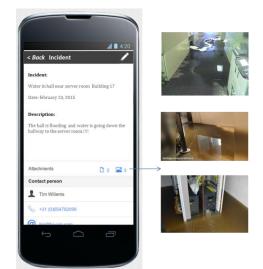

In case of an incident employees get an alert with enclosed all relevant information to act right and immediate. Dependent on the incident this can be an evacuation plan, floorplans with fire equipment, communication protocols, important numbers to call or the installation procedures for the latest backup. All timely and up to date via PC, tablet and mobile phone.

### Alert

With 1 press of the button Ba-PRO Right Response alerts a group of employees or third parties and bring them up to speed on the latest situation and provide instructions and relevant information on all platforms from PC to mobile.

# Ease of use

Ba-PRO Right Response centrally manages all information and documents about the resources that are crucial for the continuity of your business. Information about buildings, floorplans, fire systems with their certifications, IT systems, machines, version numbers, maintenance plans etc, all securely centrally managed and always available.

Your incident response plans are stored on the same system. So in case of an incident you can provide the correct plan and the relevant resource data to your teams to give them exactly what they need when they need it.

The built in search and browse functions make all information available when you need it, be it plans, employee alert lists or version numbers to give to your suppliers.

# Always available

The Right Response system is externally hosted which ensures availability even why your own systems are down.
